The eight p.m. slot at nearly any SXSW showcase is often a thankless lot to have drawn, as many festival attendees are still

finishing up dinner (or sleeping off that afternoon's hangover). But when Austin's **The Alice Rose** plugged in for its early set last month, the band demonstrated to a small but appreciative hometown crowd exactly why NPR found its 2006 album, *Phonographic Memory*, worthy of glowing praise. In concert, lead vocalist JoDee Purkeypile croons like a young Elvis Costello (albeit without the snarl or chip on his shoulder), while whimsical piano melodies add blissful psych-pop touches to the band's tunes. And while early Costello albums are an influence, better touchstones for the Alice Rose's lush power-pop are the Shins, the Beach Boys and especially the beloved cult act Jellyfish. **Team Tomato** and Pavement-esque rockers **Perry Went Home** open.
